

## **Artialis has been nominated for the Deloitte's 2018 Technology Fast 50**

***Liège, October 25<sup>th</sup> 2018* – For the third year in a row, Artialis has been nominated for Deloitte's 2018 Technology Fast 50 competition for technology companies headquartered in Belgium. The Fast 50 award will be given to the country's fastest-growing technology company, based on its percentage of growth in turnover during the last four years. The ranking will be announced at the Awards Ceremony on 15 November 2018.**

Considered as a leader Contract Research Organization (CRO) specialized in the field of musculoskeletal disorders and healthy aging, Artialis provides a complete and customized solution of preclinical studies and clinical trials including innovative biomarkers, medical imaging, and functional tests. Artialis differentiates from other CRO by developing innovative biomarkers for evaluating the progression of musculoskeletal diseases.

"We are proud to be nominated three year in a row for the Deloitte's Technology Fast 50. This nomination testifies to the sustainability of our business. Artialis is a leader in its field and has enormous potential. Our portfolio is growing rapidly and our pipeline still contains many riches. We are very confident about our future", said Professor Y Henrotin, CEO and President of Artialis Group.

### **About the Deloitte's 2018 Technology Fast 50**

The Technology Fast 50 competition is an annual selection of the 50 fastest growing and innovative technology companies headquartered in Belgium. Public or private companies who develop a technology related product or service and who have experienced substantial revenue growth over the last four years can enter the competition for their chance to be nominated as one of the 50 fastest-growing technology companies in Belgium.

Companies that have been active in the technology sector for less than four years can participate in the special Rising Star category of the competition. These companies are judged by an independent jury on their turnover potential and scalability.

Participating in the Technology Fast 50 competition can help companies to develop their business by increasing their visibility and giving them access to the Fast 50's unique network of highly successful executives.

### **About Artialis**

Artialis is a partner for the development of therapeutic approaches in the field of age-related diseases including musculoskeletal health, inflammation, and metabolic syndrome. Integrating scientific expertise and support for research, Artialis is able to manage every stage of drug development, from preclinical development to post-marketing studies. The company provides tailor-made preclinical and clinical trials solutions, combining innovative tools for evaluating the efficacy of treatments as soluble biomarkers, medical imaging, and gait & motion analyses.

Artialis was founded in 2010 on the initiative of Professor Yves Henrotin as a spin-off of the Bone and Cartilage Research Unit of the University of Liège (Belgium). For more information, visit [www.artialis.com](http://www.artialis.com).
